

CAN YOU GU SS?

If So You Can Get The
Kentuckian a Year Free

The Kentuckian will give a year's subscription to the person who can guess nearest to the exact official population of Hopkinsville as announced by the U. S. Census Department. Open to everybody except government officials. Send in your guesses sealed and marked "Population" on the envelope, as they will not be opened until the count is made.

Just or Unjust.

Just a tiny patch of moonlight,
Just a summer night in June;
Just a hammock, a piazza,
Just a dreamy distant tune.
Just a cuddly girl beside you,
Just an arm about her waist,
Just a pressure light of two lips,
Just a parting made in haste.

Why are lovers all molested
Just at moments just like this?
Why are unjust people passing
Just in time to see that kiss?
Frederick Hall Lane in June Smart Set.

A Good Thing About a Girl.

One good thing about a girl, from a man's standpoint at least, is that she doesn't come around, as soon as she begins to wear long skirts, asking her father questions that he can't answer without being embarrassed.

Tennis and Temperament.

In a tennis tournament (more truthfully than in a confessional) are revealed the good and bad qualities of human nature. The man who loses gracefully, plays with a bad partner without afterwards alluding to his deficiencies, and honestly admires an opponent's skill, may be trusted not to fail in any other trial of life.—London Black and White.

Woman loves a clear, rosy complexion. Burdock Blood Bitters purifies the blood, clears the skin, restores ruddy, sound health.

Excusable Resentment.

"It's really provoking," said the fond mother, "baby always cries when we have company." "Well," answered Mr. Groucher, "you can't blame children for disliking company. If it weren't for visitors they wouldn't have to recite or play pieces on the piano."

Unlike Most of His Kind.

"Let the children eat candy; it is good for them," says a scientist. Can a person who is willing for anyone to do what he wants to do be really a scientist?

There's nothing so good for a sore throat as Dr. Thomas' Electric Oil. Cures it in a few hours. Relieves any pain in any part.

The Best.

An almost forgotten poet, Robert Hinkley Messinger, quaintly wishes for old wood to burn, old books to read and old friends to talk with in an ideal old age, and he might also have added, old tunes to be played in the long twilights while he dozed and dreamed in his easy chair.

Illiteracy in India.

Less than six people out of every hundred in India have ever learned to read or write.

Things That Make Up Life.

Opportunities are the fuel of life, ability is the match which kindles it, and will power is the fan which keeps the flames alive.

Torturing eczema spreads its burning area every day. Doan's Ointment quickly stops its spreading, instantly relieves the itching, cures it permanently. At any drug store.

Heart Not Always on the Sleeve.

A light manner does not necessarily mean a light heart. Nine out of ten jest to cover a sorrow. It is better so, and you may find serious worth under that gayety you fear.

Relic of Ancient Egypt.

The British museum possesses a chair—the throne of Queen Hatshepsut—which was in use some 3,500 years ago.

No Jewish Lullabies.

It is remarkable that notwithstanding the love and devotion of a Jewish mother there seems to be no trace of a real Jewish lullaby. Those known are of a recent origin.

Doan's Regulets cure constipation, promote digestion, stimulate the liver, promote digestion and appetite and easy passage of the bowels. Ask your druggist for them. 25c a box.

Importation of Birds.

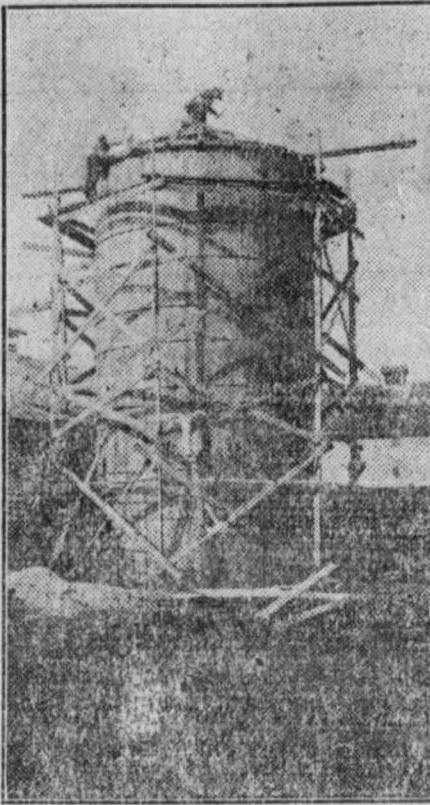

More than \$300,000 worth of birds were imported into this country during the year 1908. They were largely parrots and canaries.

VALUE OF SILAGE
FOR THE STEERS

Owing to the high price of roughage more interest is being taken by cattle and sheep feeders in the subject of corn silage than ever before. The silage idea has not enjoyed much popularity in feeding circles despite the fact that it has become the mainstay of the dairyman. The past winter, however, has set feeders thinking, and the fact is dawning on many feeders that silage may extricate them from a dilemma in which the rapid increase in the feed bill when practicing dry feed methods exclusively has placed them.

Every feeder using silage who has marketed cattle or sheep on the market during the past three months has given a good account of it, and they are by no means a corporal's guard, some of them operating on a large scale.

Now comes the Indiana experiment station with more conclusive evidence, that institution having pioneered in this sphere. Recently a professor at that station sold on the Chicago market fifteen short fed cattle that had been fed no other roughage than corn

CONSTRUCTING A STAVE SILO.

silage, and, to use his own language, "results show that silage is a very economical roughage for fattening beef cattle on the short process." Fourteen of these steers realized \$8 per hundredweight, and a tall ender was appraised at \$7.75, pretty good prices for steers fed only 120 days.

The ration was shelled corn, cottonseed meal and corn silage, absolutely no other roughage being used. The initial weight was 1,056 pounds; the final weight 1,361 pounds, making an average daily gain of 2.54 pounds in a season when the burden of complaint among feeders was that gains were far below normal. The feed consumed to the pound of gain was 6.09 pounds of shelled corn, 1.06 of cottonseed meal and 12.67 of corn silage.

This marks completion of but one stage of the experiment, but it disproves the theory that only a limited quantity of silage can be used and that other roughage is essential. There are seventy-five cattle on full feed at the Indiana station now to determine the merit of different combinations of shelled corn, cottonseed meal, corn silage and clover hay.

It may be added that a well known sheep expert of the Illinois experiment station is conducting a series of experiments in mutton making with corn silage and has already reached a conclusion decidedly favorable. To his surprise the heaviest ration of silage used has given most satisfactory results, and even among lambs an expected mortality of at least 1 per cent has not materialized.

THE FEEDER

Dry/Uncooked Corn Best.

Cooked corn does not seem to be so good for hogs as that fed dry and uncooked. They do not seem to make as good use of it.

Putting the Flock on Pasture.

The sheep will begin to get uneasy now for the pastures. Be in no hurry about letting them go. Have a good stand of grass in the field before they are put out for the season.

Keep Horses Away From Barbed Wire. Don't pasture horses or other animals on both sides of a wire fence, especially if it has a barbed wire at the top. They are very apt to get to fighting over or through it and get hurt.

Time to Water Horse.

It does not make much difference whether horses are watered before or after eating. It is largely a matter of habit, and experiments show that one time is about as good as another.

Feeding Pig For Pork.

The pig that is intended for pork should be fed to the limit of its digesting capacity from the start. To feed the pig just enough so that it may hold its own is wasting all your feed. As a rule, the quicker we can make 100 pounds of pork the less it costs us, and the first 100 pounds cost the least.

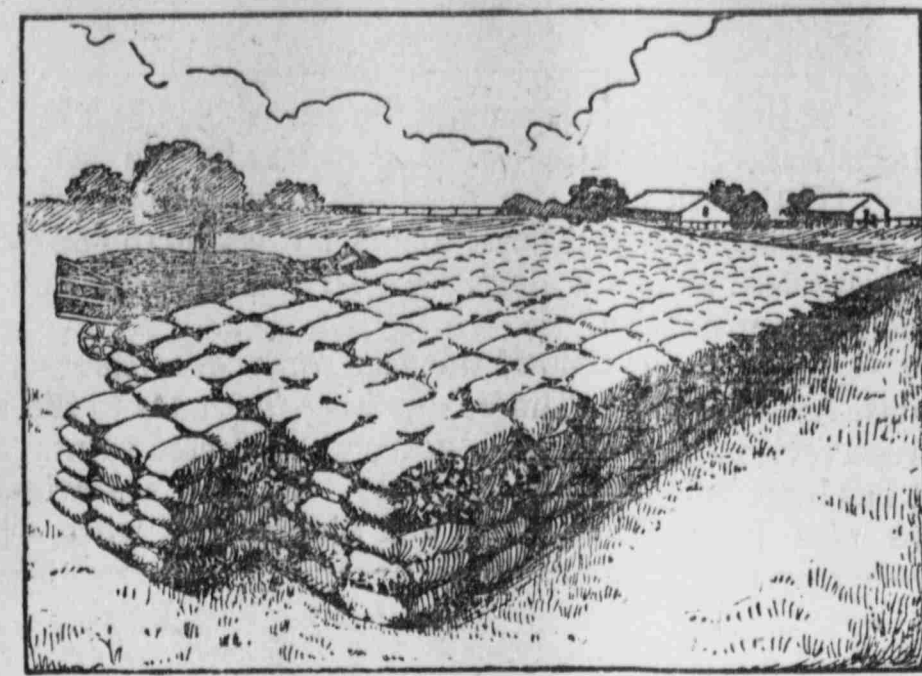

Ration For Calves.

A good ration for calves is cornmeal, three pounds; oats, three pounds; bran, one pound, and linseed meal, one pound. Feed from one-half to three-quarters of a pound of the mixture for every 100 pounds live weight.

"DOLLAR WHEAT"

What It Means to The Farmer.

TRUSTS and monopolies are usually considered to be unfair, because they tend to make the rich richer and the poor poorer. Nevertheless, in some cases, the producers are directly benefited. For instance, when a big "corner" raises the market price of grain and produce to a fabulous sum-

the farmer benefits. If he does not part with his wheat too early, and a dollar a bushel would mean, on an average, that over \$750,000,000 would go annually into the pockets of the farmers of the United States. The operators, later, buy up all the available grain and store it in big elevators, awaiting the proper moment to unload it on the market at the best price.

In the same way that the earth yields food for man, so does it provide remedies for human ills. Thousands of households throughout the farming districts of the United States know the value of Dr. Pierce's Golden Medical Discovery. It is nature's most valuable and health-giving agent—made without the use of alcohol. It contains roots, herbs and barks, and is the concentration of nature's vitality as found in the fields and woods. This remedy has a history which speaks well for it because it was given to the public by Dr. R. V. Pierce, founder of the Invalids' Hotel and Surgical Institute, at Buffalo, N. Y., nearly forty years ago, and has since been sold by dealers in medicines in ever increasing quantities. Some medicines, tonics or compounds, enjoy a large sale for a few years, then disappear from the public attention, but Dr. Pierce's Golden Medical Discovery has proved such a reliable blood remedy, tonic and liver regulator, that it often enjoys the confidence of several generations in a family, and its increased sales year by year coming from the recommendations of those who have tried it, prove its lasting merit, so that every bottle bears the stamp of public approval. Every other well-known liver regulator, blood maker and tonic for the stomach that we know of contains alcohol but Dr. Pierce guaran-

tees that no alcohol is contained in his "Medical Discovery." This remedy works in the natural way, by throwing out the poisons from the blood and correcting the irregularities of the stomach by promoting digestion and assimilation. The blood is cleansed and fed on proper nourishment, the nerves get rich, red blood, and in consequence nervous troubles disappear, for they are often due to improper nourishment. Neuralgia is the cry of the starved nerves for food. Feed the nerves on pure, rich blood and nervous symptoms will disappear. The result of indigestion and dyspepsia is that the

person's blood becomes thin and watery because it is not fed on that nourishment which it should take from the food, and the person becomes nervous and sleepless. All such persons we advise to take the "Golden Medical Discovery" three times a day.

"I was suffering from loss of appetite, pains in stomach, bad cough and headaches, and was getting very thin and weak," writes Beatrice M. Elliot, of Park Hill, Ontario. "I was advised to try Dr. Pierce's Golden Medical Discovery and 'Pleasant Pellets.' After following this advice I am happy to say my health is greatly improved."

D. W. Hillborn, of Haysville, Ontario, writes: "My little girl has been subject to bilious spells, and after trying other remedies without effect, and doctoring, we gave her Dr. Pierce's Golden Medical Discovery. She has not had an attack since taking the first bottle, and besides her system is better fortified against colds. When she takes a cold, she has not the deep, croupy cough that accompanied it at former times. Although having always been thin she is gaining in flesh now, and we consider her improvement due to the 'Golden Medical Discovery.'"

DO YOU KNOW YOUR OWN SYSTEM? A complete medical book and physiology of the body, is Dr. Pierce's Common Sense Medical Adviser, which can be had for the price of postage. Is a thousand page book and fully illustrated, some of the pictures in colors. Send to Dr. R. V. Pierce, Buffalo, N. Y., thirty-one cents in one-cent stamps for the cloth-bound book, or twenty-one stamps for the paper-bound volume.

Jack Daniel's

OLD OLD SOUR
No. 7
TIME MASH.

Made at the old-time distillery, Lynchburg, Tennessee, the home of pure whiskey for a century.

Gold Medals and Diplomas Awarded at St. Louis, 1904—Liege, Belgium, 1905

At the Club or at Home

Jack Daniel's No. 7 is the peer of whiskey. It satisfies. Its mellow flavor brings delight to the palate. Straight or high-ball, cocktail or toddy, it's the whiskey used by those who really know.

Its absolute purity and ripe maturity make it delicious in health, necessary in illness.

12 full quarts No. 7, \$15.75, express prepaid.
1/4 full quarts No. 7, \$ 6.00, express prepaid.
12 quarts 5 to a gallon, \$12.75, express prepaid.
4 quarts 5 to a gallon, \$ 5.00, express prepaid.
Jack Daniel No. 7, bulk, age and proof considered, \$4.00 to \$6.00 per gallon.

We are compelled to make the advances in the prices as above on account of having to shut down our distillery in Tennessee. We sell nothing but the strictly pure article as it comes from the still and as we do not mix nor blend our whiskey age and proof fix the price.

All mail orders carefully and promptly attended to. Address all orders to
